

DocuNet V3 iPad Application

Version 3.1.2

Document type	Release notes
Document date	18/03/2016
Software	DocuNet 3.1.2
Document version	1.0
Author	Pat Bloxham
Build	501

1. What's New?

The following section will discuss all newly added features that are part of the new DocuNet 3.1.2 application.

Headline	Users can now email device logs via the settings page
Detail	<p>We have added a new option into the settings menu to allow users to send the device application logs straight to Vistair. To send the logs, ensure you have a mail account set up on the device and select the below option from the Settings page:</p>  <p>The screenshot shows the iPad Settings app. At the top, it says 'iPad' with a Wi-Fi icon. Below that is a grey header 'Settings'. There are three settings visible: 'Night mode' with a white toggle switch, 'Text size' with a slider set to 100%, and 'Update Over Wifi Only' with a green toggle switch. At the bottom of the settings list, there is a red button labeled 'Email Logs'.</p>
	Please only send the logs if we have requested them.

Headline	Unregister Device
Detail	<p>Users now have the option to unregister their device and successfully logout from DocuNet. To unregister the device, select the below option from the Settings page within the app.</p>  <p>Please note: This will also unregister all Vistair apps installed on the device.</p>

Headline	Improved bookmark functionality.
Detail	We have fixed issues around users being taken to the wrong page after saving a bookmark.

Headline	Background update notifications
Detail	Issue with the app getting notified of updates when in the background

Headline	General bug fixes and improvements
Detail	This includes a fix to the table of contents closing when navigating the menu.

2. iOS Requirements

DocuNet 3.1.2 has been written for iOS 8. This means that any clients using any versions older than iOS 7 will need to upgrade their device to the latest version of iOS to use the application.

Full testing has been completed on iOS 9.3 however we have also completed a regression pack using various other versions of iOS8 and above.

We would highly recommend users to upgrade to the latest version of iOS to be able to use DocuNet 3.1.2
