Release Notes

Document Type	Release Notes
Document Date	9-AUG-2017
Software	DocuNet Viewer for Windows
Software Version	2.4

© 2017 Vistair Systems Ltd

1. What's New?

1.1 New Features

Headline	**Annotation synchronisation**
Detail	Annotations now automatically synchronise to the cloud and to other devices you have registered. Synchronisation occurs at each update check or when annotations are changed, provided you are online.

2. Platform Compatibility

DocuNet is known to work on devices with the following minimum specifications:

- OS: Windows 7
- CPU: 1.4GHz minimum (based on Intel i3 platform)
- RAM: 4GB
- Disk Size: 130MB available (+ space required for the manual library)

Also compatible with:

- Windows 8.1, 10
- Windows Surface Pro 3 and 4
- Toughbook
- Toughpad
- Acer Ultrabook

3. Known Issues and Limitations

This section discusses key product limitations that may be useful for administration and support. The issues listed are already known to the development team.

#	Priority	Description	Workaround
1	Low	Text on print out from PDF documents is sometimes corrupted	Restarting the app and then printing can often help
2	Low	Text colouring in the library list for updated documents is not remembered if the app restarts	None
3	Low	PDF Page rotation can be slow when the page has lots of text or certain custom fonts	None
