1. What's New?

This document outlines the changes in DocuNet Viewer for Windows v2.2.

1.1 New Features

| Headline | Annotations |
|----------|---|
| Detail | <p>Highlighting and Annotations: It is now possible to highlight text and add annotations, this replaces existing bookmark functionality with a choice of highlight colours and other options.</p> <ul style="list-style-type: none">Existing bookmarks are converted to annotations on update. Converted bookmarks will need to be repaired to become full annotationsAll annotations are viewable in a list and can be used to navigate to the correct section in the documentAnnotations are searchable, both by content and by your notes.Annotations follow updated manuals. Any items that relate to areas that have moved or changed content will be flagged and you can easily reattach the annotation to new content if still relevant. |

| Headline | Allow selection of text for copying |
|----------|---|
| Detail | You can select text of manual and copy the highlighted content by 'Ctrl + C'. |

| Headline | PDF Rotation |
|----------|--|
| Detail | You can rotate pages in PDF documents. |

| Headline | Printing |
|----------|--|
| Detail | You can print the currently viewed document page |

| Headline | Administrator Options via docunet-gui.config file |
|----------|---|
| Detail | <p>We have now made new options available for administrator to make their own settings for some feature by adding defined commands into docunet-gui.config file in the application folder. The commands are</p> <ul style="list-style-type: none">• “disable.printing=true” will disable the printing feature in the application.• “disable.annotations=true” will disable the annotation feature.• “delete.annotations=true” will delete all annotations each time the application is launched.• “basic.settings.only=true” will prevent the access to the Advanced and Connection settings Panel in the application. |

1.2 Bug Fixes

| Headline | Update changes |
|----------|---|
| Detail | Improved robustness in the event of network issues, and improved performance applying metadata updates. |

| Headline | Expanded document groups collapses during updates |
|----------|---|
| Detail | We have fixed an issue where the library list groups collapse each time updates are checked for. This will now only occur when documents are actually updated |

| Headline | Selected filter should be retained between tabs |
|----------|---|
| Detail | We have fixed an issue with audience filtering in new tabs. The selected audience filter will apply to the new tab now. |

| Headline | Manuals not in group will be duplicated |
|----------|--|
| Detail | We have fixed the issue for duplicating manuals that are not in any group. |

1.3 System Maintenance

| Headline | Show licences for 3 rd party libraries |
|----------|--|
| Detail | The application now includes information for 3 rd party libraries in the settings screen. |

| Headline | Pop-out Image Viewer |
|----------|---|
| Detail | We have now done some improvements to pop-out image viewer to work effectively in both landscape and portrait mode. The improvement areas are zooming in, zooming out and closing the pop-out viewer. |

| Headline | Application Window size/position remembered |
|----------|---|
| Detail | If not started in full screen mode, the application will remember and restore the size and position of its window if it fits on the screen. |

| Headline | Multi-touch improvements |
|----------|---|
| Detail | There are several improvements to improve support for multi-touch displays. |

2. Platform Compatibility

List the versions of the intended platform that this app is known to work with.

- OS: Windows 7, Windows 8/10
 - CPU: 1.2GHz minimum (bases on Intel Core 2 Duo platform)
 - RAM: 2GB
 - Disk Size: 220MB available (+ space required for the manual library)
- Also compatible with
Windows Surface Pro

3. Known Issues and Limitations

This section discusses key product limitations that may be useful for administration and support. The issues listed are under investigation and are scheduled for a future release.

| # | Description | Workaround |
|---|--|---|
| 1 | Print output is corrupted. The text in the print out is unreadable. This is a bug in the underlying framework used to build the app | Restart the app and print the page again |
| 2 | Text disappears on the page while selecting it. This is mostly an issue with PDF pages. It is caused by known bugs in the underlying framework used to build the app | Try selecting smaller amounts of text on the page |
